DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method of providing a program to a user for storing and presentation in segments transmitted over different channels, classified in Class 725, Subclass 101.
 - II. Claims 12-21, 23-26, 33-37, 42-47 and 49, drawn to a method and system for providing regional and non-regional information segments to a user, classified in Class 725, Subclass 36.

Inventions I and II are related subcombinations disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately useable. In the instant case, Invention I has separate utility such as the transmission and viewing of multimedia over the Internet. Invention II has separate utility such as targeted advertising.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2697

2. A telephone class was made to Michael Straub on September 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
